

REPAQ[®] Retest and Reuse Program

Qualified Packaging Solutions ...EVERY TIME.

With CSafe's REPAQ[®] program, you can have your AcuTemp[®] VIP shipping solutions cleaned and re-qualified for reuse. The inspection process includes thermal testing of the VIP so you can be assured that your packaging meets the original solution specifications every time.

REPAQ[®] Retest and Reuse Program - The Success is in the Test

The goals of most reuse programs are the same – reuse allows lower costs and reduces environmental impact. The packaging is cleaned, visually inspected and returned to the customer for reuse. Some programs may even do random visual testing of the packaging. The CSafe REPAQ program is the only one that ensures you receive qualified packaging EVERY single time by thermal testing of 100% of the returned VIP. The effectiveness of VIP cannot be determined by a visual inspection alone. VIP, like polyurethane and EPS, will degrade over time, something that a visual inspection may not reveal. All shippers in the REPAQ program are thermally retested to insure that when they re-enter the cycle, the thermal integrity and performance meets requirements.

Typically a reduction of

30 – 40%

in supply chain costs with
the REPAQ[®] Program

*Adopt a greener shipping process and enjoy
the cost savings without sacrificing quality.*

Frequently Asked Questions

What is required to set up a REPAQ® Program?

CSafe Global will assign an account manager to your account who will work with you to set up the program to ensure its success. The setup includes the following:

- Identify the necessary packages (size, temperature ranges, durations and payload volumes)
- Identify the most efficient process working with your logistics partners
- Helping to educate your supply chain from operation to recipients of packages to ensure the highest level of compliance

What is the Impact on Your Staff and End Users?

CSafe Global provides assistance every step of the way:

- **For your staff:** We help implement the program by providing all of the qualification reports, work instructions, materials and training required.
- **For your logistics team:** The simplicity and ease-of-use that AcuTemp VIP solutions offer is the best in the industry. This improves inbound and outbound logistics as well as ease within your operations.
- **For your end users:** Your destination sites will no longer need to dispose of the packaging which saves them money. They simply leave the box for pick-up using the return label applied.

How do you get packages back for reuse?

Each package contains a return label which is simply applied to the box once the payload is retrieved. The package is simply picked up and returned to a CSafe REPAQ location.

What are the benefits?

Using AcuTemp VIP solutions typically provides a 20-30% cost reduction while meeting the highest level of quality in the industry. Add on the REPAQ program, and another 30-40% cost savings can be achieved, let alone the environmental benefits and customer service improvements.

The REPAQ Program

- Over five years of experience and over 250,000 AcuTemp solutions re-qualified
- Reduces overall supply chain packaging costs by 30-40%
- No cost to be part of the REPAQ Program
- VIP solutions that begin at US\$16
- No asset tracking required for operational ease
- Simple pack outs using ThermoCor VIP designs
- Training and program education for sales, customer service, manufacturing, operations, shipping and client program awareness
- Easy return program made simple to ensure high rate of customer compliance
- Packaging used in the REPAQ program is easily identified for return and reuse
- CSafe Global network of reclamation centers
- 100% retesting on return packaging to insure 100% return to original pre-use specifications
- Reduce unnecessary landfill waste and is an efficient, effective and environmentally responsible packaging program
