

The AcuTemp courier is a hand-held portable solution to the challenges of transporting temperature-sensitive products during the final steps of transit and is used by healthcare providers, pharmacies, doctors, clinics and research labs.

The soft-sided courier uses a unique PCM design (patent pending) allowing for mobility and simplicity with a customizable, reliable, easy-to-use and reusable temperature management system.

To better provide for individual delivery requirements, we have developed three sizes, each with customizable options, to transport payloads 2-8°C, 2-25°C and frozen.

At CSafe, we believe in working with you to choose the solution that will best suit your exacting needs for each individual shipment, no matter how large or small. Speak to one of our experts today.

Features Include:

- One set of PCM belts
- Only standard freezing required
- No conditioning time required
- Water resistant bottom with skid resistant feet
- Adjustable/detachable padded shoulder strap*
- Handles positioned for easy mobility
- Back straps to accommodate cart*
- Solutions available in 2-8°C, 2-25°C and frozen
- Optional Cart (sold separately)

*Note: Not all features are available in all sizes

CSafe Global is the world's leading expert in cold chain solutions. Our passive and active containers ship temperature-sensitive materials around the world for the pharmaceutical industry, biotechnology, military, disaster relief organizations, airlines, forwarders and logistics specialist. We have the solutions, knowledge and expertise to guarantee Peace of Mind® that your temperature-sensitive goods are transported at **The Right Temperature®.**
