

PARCELS

Passive temperature-controlled packaging with VIP insulation

Technical specifications

The CSafe AcuTemp® passive packaging portfolio, with Vacuum Insulated Panel (VIP) technology, assures greater Peace of Mind® in your cold chain, promising industry-leading temperature management performance and versatility for the safe transport of vital life-science products to distribution centers, healthcare facilities and patients. AcuTemp parcel solutions have a user-friendly design and are available in a wide variety of pre-qualified and custom configurations.

Industry-leading performance for Peace of Mind

- Best-in-class thermal protection with ThermoCor VIP
- Lightweight design for lowest total cost of ownership
- Broad portfolio with a selection of payload sizes across temperature ranges and shipment durations
- Optimal parcel dimensions to maximize payload volume
- Simplistic pack-out design

Solution advantages:

- Superior ThermoCor® VIP insulation, providing optimal thermal protection for payloads
- Solutions available to meet various temperature profiles:
 - ▶ AcuCool (+2°C to +8°C)
 - ▶ AcuZone (+15°C to +25°C)
 - ▶ AcuFreeze (-60°C, -40°C, -20°C)
- Extended hold times offering thermal protection for 48hr, 72hr, 96hr and 120+hr shipment durations
- Simplistic solution conditioning with our proprietary Phase Change Materials (PCM)
- Broad range of payload sizes available from XS to XL
- Optimized packaging dimensions to maximize payload volume for lowest possible shipping costs
- Universal designs, ideal for global distribution
- User-friendly, efficient pack-out concept to simplify operations
- Pre-qualified configurations to meet rigorous ambient temperature profiles
- REPAQ® requalification and reuse program available to ensure thermal integrity and sustained performance of parcels

Outside the box thinking for premium inside the box design

Unmatched thermal protection with ThermoCor VIP

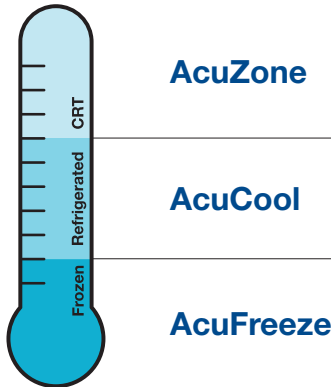

AcuTemp parcel solutions utilize CSafe’s proprietary ThermoCor VIP insulation to provide optimal thermal protection for payloads

- Best-in-class VIP performance for superior temperature control and extended durations
- Precise end-to-end thermal protection of internal payloads with one of the industry’s highest R-values
- Lightweight design for lowest total cost of ownership

A broad range of VIP passive solutions to best meet any cold chain need
