

CSafeRAP

Active Temperature-Controlled Air Cargo Container

The CSafe RAP is the latest innovation in high-performing active temperature-controlled containers. Thoughtfully designed to support pharmaceutical and life science companies with air cargo transportation of temperature-sensitive products to patients around the world. Developed and designed with performance in mind, the CSafe RAP utilizes innovative heating and compressor-driven cooling technologies together with advanced vacuum insulated panel (VIP) insulation to eliminate the risks to payloads associated with extreme ambient temperature conditions and long-duration shipments. The CSafe RAP leverages the proven performance and capabilities of the well-established CSafe RKN to remove the operational and environmental challenges encountered with temperature-controlled shipments.

Key Features

Advanced active container system

Unmatched operational capabilities in extreme ambient temperatures

Innovative air recirculation system (ARS) for complete encapsulation of payload

Superior VIP insulation

Largest RAP payload in industry

End-to-end real-time shipment visibility with alerts

Array of 10 temperature sensors throughout cargo compartment

User-selectable temperatures from +4°C through +25°C

PAYLOAD (LITERS)
6680

TEMPERATURE RANGE
+2°C to +8°C
+15°C to +25°C

DURATION (HOURS)
120+
