

Cost-effective, Single-Use Shipment Data Logger

TracSafe PRO is a simple and cost-effective solution for logging temperature stability during transit. This lightweight device begins logging data with the push of a button and then goes directly into your payload box. Once the payload is unpacked, simply press the button again to stop tracking and download the data via the USB. The exceptional battery life of up to 120 days while recording ensures that not a single moment is missed throughout the shipment journey.
