

## Designed for transporting high-value pharmaceutical products

Softbox VIP shippers, featuring vacuum insulated panel technology, provide industry-leading temperature control and versatility, ensuring enhanced peace of mind for your cold chain.

Introducing the Softbox VIP+, the same thermal and mechanical performance of the Softbox VIP, now with an integrated datalogger compartment and reinforced corrugated plastic containment layer for additional visibility and shipment protection. Available in four payload sizes. The Softbox VIP+, when combined with our TracSafe dataloggers and CSafe Connect provides a complete solution for the safe transport of vital life science products.

### Key Features

Built-in reusability

External datalogger compartment enables ambient and payload temperature monitoring

VIP panel in top lid and corrugated plastic containment layer to reduce the risk of damage

### Key Market Differentiators

01

High-performing reusable parcel

02

Optional enhanced temperature, location, shock, and tilt visibility monitoring

03

Full-service reuse program
