

Reusable Pallet Shipper for a More Sustainable Future

We've taken our globally recognized Silverpod MAX passive pallet shipper and enhanced it for reuse to bring you CSafe's Silverpod MAX RE—a highly durable PCM pallet shipper made entirely of reusable components.

An alternative to our single-use pallet shippers, this new product is a sustainable solution with the reliability and exceptional quality that CSafe is known for. It includes a built-in TracSafe RLT data logger that integrates with CSafe Connect for real-time shipment visibility throughout the entire journey.

We have also made key enhancements, like adding durable exterior panels and extended edge and corner cap protection, to create a premium reusable model to help you achieve your sustainability goals. Further, our rental structure allows you to eliminate disposal costs, bringing added value to your business and your customers—with minimal impact on the environment.

Key Features

Reusable components and recyclable Pharmacool™ MAX PCM coolants

Turnkey refurbishment services included and provided by CSafe

120+ hours of qualified thermal protection

Easy conditioning process with PCM coolants, providing enhanced thermal protection and safe storage—both before and during shipping

Integrated TracSafe RLT data logger provides real-time access to tracking and conditional data through our cloud-based CSafe Connect platform

Quicker, more efficient assembly with our universal packing process

Supplied flat packed for cost-effective delivery and storage

Available worldwide

Benefits of Our Reusable Technology

Reduces environmental impact

Decreases energy consumption

Minimizes waste

Strengthens your operational efficiency
