

Reusable Pallet Shipper for a More Sustainable Future

We've taken our globally recognized Silverpod passive pallet shipper and enhanced it for reuse to bring you CSafe's Silverpod RE—a highly durable PCM pallet shipper made entirely of reusable components.

An alternative to our single-use pallet shippers, this new product is a sustainable solution with the reliability and exceptional quality that CSafe is known for. It includes a built-in TracSafe RLT data logger that integrates with CSafe Connect for real-time shipment visibility throughout the entire journey.

We have also made key enhancements, like adding durable exterior panels and extended edge and corner cap protection, to create a premium reusable model to help you achieve your sustainability goals. Further, our rental structure allows you to eliminate disposal costs, bringing added value to your business and your customers—with minimal impact on the environment.

Key Features
