CSafeCONNECT

Integrated Digital Cold Chain Ecosystem

CSafe Connect is a cloud-based customer portal that brings ordering, tracking, reporting, and customer support together under a single login, giving your team a truly integrated cold chain ecosystem. With no limits on the number of user accounts, CSafe Connect scales with your team. Manage and monitor shipments in real time, log a support ticket, and download important product materials, all in one place.

For teams that want to incorporate shipment data into their own systems, CSafe Connect supports API integration that enables near-real-time sharing of telemetry data for leased containers, including container conditions and GPS location. Combined with mobile access for on-the-go visibility, CSafe Connect is designed to fit the way your business operates.

Key Features

- Ability to monitor shipments in real time
- Optimize shipments with lane risk analysis and load planning tools
- Ability to view and export data in real time during the shipment to intervene as needed
- GDP compliant standard shipment report (PDF)
- Alerts provided in the platform by email
- API integration for near-real-time sharing of telemetry data
- Manage shipments and monitor key information via the mobile app
- Place re-orders quickly and easily with just a few clicks
